

A denture cleaning brush that can be purchased at any store that sells dental supplies. Sometimes the wire brush plugs with adhesive. Two strokes with this brush and the wire brush and this brush are clean.

Cut off one row of bristles so the brush fits in the recess in your lower denture plate.

#### A Fast Way to Clean Dentures.

- This wire brush can be purchased at a welding supply or Rural King, Tractor Supply or Farm & Fleet. It will not damage your dentures. Get the one with brass bristles so it does not rust.
- Go to a facet with hot water and scrub vigorously. A few strokes will remove the adhesive.

I have tried all the denture adhesive at Walmart and this is the best

#### Tips For Dentures

- Use the denture adhesive shown about. It holds and seals the best and comes off the easiest.
- Don't waste money on denture cleaning tablets. Put your dentures in a container with hot water and add some liquid soap. Yours dentures will be as clean as with the tablets.
- When eating away from home, take a couple of paper napkins with you. If after eating, your dentures bother you, take them out, rap them in a napkin and put them in your purse or pocket.
